

Philippe Mirindi *Software Engineer*

✉ lukogophilippe26@gmail.com ☎ +243 992210266 📍 Goma DRC

Summary

Versatile Junior Software Developer with a strong track record of contributing to diverse web development projects. Highly proficient in building scalable applications using **Python, C#, C++, and PHP**, with a deep mastery of modern front-end technologies like **HTML5, CSS3, Tailwind CSS, and Bootstrap**. Experienced in leveraging frameworks such as **Laravel and React** to deliver clean, efficient code. A collaborative team player with a rigorous approach to software architecture and a keen interest in the fine-tuning of logic systems and data-driven model optimization

Education

Bachelor : software engineering

Goma DRC

ISIG (Institut Supérieur d'Informatique et de Gestion)

Focused on full-stack development, algorithmic logic, and software architecture.

Gained hands-on experience in multiple languages (Python, C#, PHP) and modern frameworks. Strong emphasis on agile collaboration and building scalable, data-driven applications

State Secondary School Diploma in Business & Management

Bukavu DRC

Complexe scolaire ESPOIR 1

Focused on economics, accounting, and organizational management. Developed strong analytical and professional communication skills

Professional Experience

IT Intern – COOPEC PILOTE (Credit Union)

07/2024 – 11/2024

Managed internal IT systems and provided technical support. ensured network security for financial operations. Developed a deep understanding of data integrity

Backend Developer – Local E-commerce Platform

01/2026

Developed the core engine and API for a local marketplace. Handled secure payment integration, inventory management, and order processing

Full-Stack Developer – Law Firm Management System

05/2025

"Designed and implemented a comprehensive management tool for legal cases, client tracking, and scheduling. Built with a focus on data privacy and workflow automation

Projects

- **Mood Recognition System:** "Built an AI-driven system using Python to classify human emotions through facial/textual analysis."
- **Football Score Predictor:** "Developed a predictive model based on historical data analysis and statistical probability."
- **Massive Citizen Database:** "Engineered a scalable database architecture designed for high-volume citizen registration and efficient data retrieval with laravel , php , mysql"

Awards

Winner – University Web Development Competition

Ranked 1st among 34 participants for designing and developing a high-performance web application, judged on code quality, UI/UX, and technical innovatio

Technical Skills

Full-Stack Web Development

PHP (Laravel), JavaScript (React), HTML5, CSS3
(Tailwind CSS, Bootstrap).

Database Management

MySQL, PostgreSQL, Massive Data Architecture,
Data Integrity

Tools & Collaboration

Git/GitHub, Agile Methodology, API Integration

Software Engineering

C#, C++, Python (Scripting & Automation)

AI & Data Science

Data Annotation, Model Training, Predictive
Analytics (Scoring), Sentiment Analysis

Languages

- French
- English
- Swahili
